# Carpooling: Commute to Work Together!

Want to help protect the environment, save money, or simply try a new way to commute? **CARPPOOLING** is here for you. And what is it exactly? It's a transport method in which drivers **offer rides to passengers** - it's ideal for regular trips to work and back home. A key point is that both sides - driver and passenger(s) - need to get to a certain place at a certain time.

Register at [carpooling.bbcentrum.cz](http://carpooling.bbcentrum.cz) and learn more about this service.

Carpooling became popular in other parts of the world back in the 1970s, and its popularity continues to grow here as people become more interested in reducing transport costs and helping to protect the environment. Try it yourself - whether as a driver or a passenger!

## New Mosaic Decorations. Food for Thought for Passersby

The formerly grim **underpass under the highway** near the GAMMA Building is today decorated with **artistic mosaics by Jan Lukeš**, created as part of the Shards of Joy project.

The mosaics, depicting the underwater world and the land above, have changed this space into an oasis of color and have improved the atmosphere immensely. **PASSERINVEST GROUP** invested a total of CZK 550,000 in upgrades to the underpass, including new lighting. Over ten months of work and around 50,000 hand-cut pieces of tile have produced a result that delights passersby and encourages them to reflect.
