Traffic in Želetavská Street is about mutual respect

As the new school year begins, we would like to remind you all of the rules for traffic on and crossing Želetavská Street. This is a mixed zone with a reduced **speed limit of 30 km/h**, which is supported by a radar in the direction of Duhová Street., which we have now supported by installing a radar in the direction of Duhová Street. Pedestrians can cross anywhere on the street, but they do not have right of way in preference to cars.

We would therefore like to ask drivers to keep to a **maximum speed of 30 km/h** and to pay increased attention with the return of pupils to school after the summer holidays. We would like to ask pedestrians to be extra careful when crossing.

Thank you for respecting each other.

Speaker: Tomáš Petrů

Peninsular Malaysia, formerly known as Malaya, is a fascinating blend of eleven federal states, each with its own distinctive character. Its large Chinese and Indian communities add to this diversity, making Malaysia a vibrant multi-ethnic society. We'll visit the rapidly growing capital Kuala Lumpur and its iconic Petronas Towers, historic Melaka, the Polynesian feel of Tioman Island, the conservative Islamic states of Terengganu and Kelantan, and culturally rich Penang.

Our guide on this virtual journey will be Dr Tomáš Petrů, an experienced specialist in Indonesian studies and a research fellow at the Oriental Institute of the Czech Academy of Sciences.

Talks from Brumlovka

When: Wednesday 23 September, from 6:00 pm

Where: première online on the **Brumlovka FB profile**

Every month, we invite people, who we feel have something to say and whose professional or personal life is somehow associated with Brumlovka. We want to seek out inspiration and advice for you, but also to present life's victories and defeats.

Different person, different topic, but always at Brumlovka.

This month: Ondřej Dědina

Ondřej Dědina takes the paths that make sense, not the easy ones. He built his career in the SAP environment, working with complex solutions, managing projects and collaborating with people. He's developed an approach based on perseverance, finding new ways forward and pushing boundaries. He applies the same philosophy outside business. Taking part in an Ironman taught him discipline, humility and perseverance – and showed him that limits often exist only in our minds. He also has a long-standing interest in longevity – how to remain physically and mentally fit not just today, but for decades to come. He channels the energy this gives him into his work and the way he leads others. Perhaps unexpectedly, he also enjoys building with LEGO bricks. It reminds him that big achievements begin with small steps, patience and the ability to see the bigger picture. He believes that once you know your 'why', you'll always find the 'how'.
